Detailed Action

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Obata et al (US 6,728,199).

3. Regarding Claim 1, Obata et al (Figs. 5-35) shows disk cartridge comprising:
a disk; a case for accommodating the disk, and including an arc-shaped surface formed at an insertion direction side of a holder, and side surfaces continuing both ends of the arc-shaped surface and respectively formed as direct lines at the insertion direction; a light transparent aperture (23a) formed contiguous with one side surface of the side surface and input laser beam; an insertion groove (32) formed between the arc-shaped surface and a portion at an ejection direction side than that of the light transparent aperture in the one side; and a function expansion groove (see Examiner's Drawing) formed between the arc-shaped surface and a continuous portion of the arc-shaped surface and another side surface.

4. Regarding Claim 2, Obata et al (Figs. 5-35) shows disk cartridge, further comprising a shutter (28) slidably mounted on the one side surface and opening or closing the light transparent aperture (23a), when inserting it into the holder, a shutter opening piece formed (53d) on the

holder being inserted in the insertion groove and the shutter opening piece being contacted with the shutter to thereby slide and move the shutter.

Allowable Subject Matter
